

ACADEMY OF MODEL AERONAUTICS

MEMBER GUIDE

WELCOME TO THE LARGEST

The Academy of Model Aeronautics is a nonprofit community of enthusiasts who come together to celebrate model aviation.

We are hobbyists who dream, design, build, and fly model aircraft of all sizes for fun and competition. We do this because we enjoy the company of fellow enthusiasts, we love flight, and we want to see participation in our hobby grow.

Our nationwide network of clubs supports this passion by providing flying fields, mutual learning, and a safe and fun environment for model aviation activities. Our organization advocates every day for the safe enjoyment of model aviation.

Our motto: Your Passion. Your Hobby. One Community.

MODELAIRCRAFT.ORG

Welcome to the Academy of Model Aeronautics, the world's largest model aviation organization! As a member of AMA, you are a vital part of our mission to grow the hobby and inspire the next generation of scientists, engineers, and aerospace aviators.

This member guide provides you with a quick reference to many of the exclusive benefits, services, and opportunities available to you as a member. Whether you're just getting started in model aviation or you've been flying for years, the benefits, support, and resources that AMA provides will help make your membership a rewarding experience.

We encourage you to make the most of your membership by taking advantage of everything that AMA has to offer from educational resources and publications to affinity programs.

For more than 85 years, AMA has been serving the model aviation community and enthusiasts just like you. We are so glad to have you with us!

Welcome to the AMA community.

Angie Martin

MODELAIRCRAFT.ORG/MEMBERS

Websites and Social Media

AMA Website

AMA's website is your all-access to everything AMA. From news, blogs, club locator, education, services, important AMA forms and documents — it's all there for you.

Social Media Connects You to the AMA Community

Visit us and join members in the conversation and photo sharing on Facebook and Instagram. Check out Flickr and our YouTube channel for more photos and exciting videos. Share your model building and flying story with our AMA Facebook group, I Fly AMA!

AMA This Week E-newsletter

Receive weekly updates with important news, events, and insights.

Government Advocacy

Protecting your freedom to fly model aircraft is the foundation of our government advocacy efforts. We work with local, state, and federal officials so that our voice is heard and acted upon.

Education and AMAFlightSchool.org

AMA's premier website is devoted to model-flying educational and training programs, activities, and resources for you, clubs, schools, and organizations.

Affinity and Marketing Partnerships

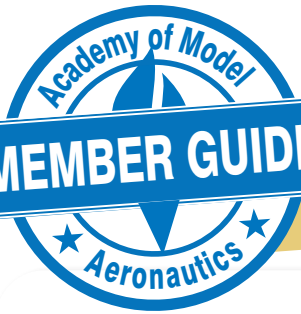

Exclusive Member Offers

Members enjoy exclusive discounts from Enterprise, Member Deals, and more. These partnerships provide valuable benefits that support and strengthen the AMA community. For more information, visit [MODELAIRCRAFT.ORG/EXCLUSIVE-OFFERS](https://www.modelaircraft.org/exclusive-offers).

MODELAIRCRAFT.ORG

MEMBER GUIDE

AMA Clubs, Flying

MODELAIRCRAFT.ORG/CLUBS | MODELAIRCRAFT.ORG

Enjoy the fun and camaraderie with other enthusiasts like yourself who love model aviation by joining an AMA chartered club. With nearly 2,000 clubs throughout the country, there's one near you. Just search the AMA club locator to find clubs in your area and their flying sites. [MODELAIRCRAFT.ORG/CLUBS](https://www.modelaircraft.org/clubs)

AMA Chartered Clubs

AMA chartered clubs receive a host of benefits, including club and officer liability insurance coverage. Plus, the property owner of the club's flying site can receive primary liability insurance, if requested. Consider starting an AMA chartered club. All you need are five adult AMA members and we'll help you get started.

Flying Site Assistance and Competition

Without flying sites, we can't enjoy our hobby. Flying Site Assistance helps clubs with advice, support, and plans to address any opportunity or issue from flying site design to guidance on local laws. We'll help you sanction your local events and competitions, as well as any international and world competitions.

Leader Clubs

Your club can become a Leader Club by demonstrating and achieving certain standards of community service and activity. Clubs qualify for three different levels based on performance: Bronze, Silver and Gold, based on performance.

Leader Members

Individuals are awarded the Leader Member title, the highest level of AMA membership, by meeting specific levels of participation, conduct, and contributions.

Become an Introductory Pilot Instructor

Share your flying experience by helping new people to learn to fly. Through the Intro Pilot program, club instructors can reach out to non-AMA members and teach them to fly for a period of 90 consecutive days. It's a great way to get new people excited about model flying and become AMA members and club members.

YOUR PASSION. **HOBBY.** **ONE COMMUNITY.**

Sites, and Insurance Coverage

T.ORG/GRANTS | MODELAIRCRAFT.ORG/FLYINGSITEASSISTANCE

Value and Peace of Mind:

Flying models is a safe activity, but sometimes accidents can happen involving people or property. Enjoy flying with peace of mind knowing that you're covered with liability, medical, fire, and theft insurance. This insurance is an outstanding member benefit that would cost you \$1,000 or more to purchase separately on your own. You're also covered for whatever type of model aircraft you fly, whether you choose to fly at an AMA club field, park, backyard, or wherever. Just fly for recreational fun and operate within the AMA's Safety Programming.

Member Insurance Benefit

\$2.5 Million Liability Umbrella

\$25,000 Medical Coverage

\$1,000 Fire and Theft Coverage

If You Purchased It Separately

\$550 or more a year

\$600 or more a year

\$30 or more a year

Note: Park Pilot members receive \$500,000 in personal liability coverage, not all benefits listed above.

AMA members can now buy low-cost commercial drone insurance.

Get a quote at [MODELAIRCRAFT.ORG/DRONEINSURANCE](https://www.modelaircraft.org/droneinsurance)

Flying Site Improvement and Disaster Relief Grants

If your club is planning to make flying site improvements, consider applying for a Flying Site Improvement Grant: [MODELAIRCRAFT.ORG/GRANTS](https://www.modelaircraft.org/grants). Chartered clubs can be awarded 25% of their project's costs (up to \$3,000). Apply by February 1 each year.

Sometimes an act of nature or other event can damage a flying site. AMA can provide a \$1,000 grant toward flying site and runway repairs. Rolling application deadline.

Club Recognition and Reward Program

If your club has received positive media coverage of its involvement in the community, AMA wants to know about it! We'll recognize your club with a cash award for radio, TV, online, and print coverage. Learn more at [MODELAIRCRAFT.ORG/GRANTS](https://www.modelaircraft.org/grants).

AMA is at another level with AMA Air. I receive the newsletters, important email updates, the thick magazine and now AMA Air on top of national support and insurance. Awesome and keep up the good work!

**MODEL AVIATION
STUDENT CLUB**

Model Aviation Student Clubs (MASCs) help schools, groups, and organizations develop an officially chartered AMA club that comes with many additional perks.

AMAFLIGHTSCHOOL.ORG/PROGAMS/MASC

University Model Aviation Student Clubs (UMASCs) create officially chartered AMA clubs that come with many additional perks focused on postsecondary schools.

AMAFLIGHTSCHOOL.ORG/PROGAMS/UMASC

Through Aviation

UAS4STEM.ORG | AMAFLIGHTSCHOOL.ORG

UAS4STEM Drone Challenge

Students explore sUAS in two competition categories: beginner and advanced! Students must work as a team to pass their ground school training, source, build, test, fly via Line Of Sight (LOS), conduct autonomous flights, and perform missions related to search and rescue, such as picking up equipment, delivering supplies, and identifying points of interest. Qualifying teams are then invited to compete internationally at AirVenture OshKosh where cash and prizes await the podium teams!

The AMA ALPHA and BETA:

ALPHA: Offers easy setup and lasting durability. This portable EPS foam and stick balsa aircraft is quickly and easily assembled thanks to its simple clip-together technology. No cutting is required!

BETA: Provides a stable platform for both indoor and outdoor flights and features our 20:1 winder and 3/16" and 1/8" FAI rubber. The AMA BETA also has lessons using STEM principles to explore flight that are available for free from the AMA Education department.

AMA has awarded more than \$1.2 million in college scholarships.

QUICK RELEASE MULTIROTOR BLADES AND HUBS

- ✂ APC has developed a unique approach for a quick release mechanism on multi rotor blades.
- ✂ The patented hub design allows for blade installation and removal without the use of tools. Blades can be replaced if damaged or removed for transport.
- ✂ The system also allows for blades to fold for storage. Simply bolt the hub to the motor and insert the blades. There is no need to remove the hub once it is attached to the motor.
- ✂ For conventional applications, a standard hub is also available.

APC is currently developing larger blades for use with the quick release hubs. Please visit the APC website for more information:

We have proudly sold
to 200+ AMA Members
in over 43 States.

Hi, I'm John Beech and like you, I've caught the modeling bug. Got a full dose as I built my first RC model, a high wing trainer, over the winter of 1972. Joined AMA in the spring and set about learning to fly. Over the next +50 years, while there have been many models to include giant scale, helicopters, and jets, the one constant's been my AMA membership . . . yeah, I'm a lifer!

Along the way, I formed **Audacity Models** (2004). My goal? An easy to build and fly RC model helicopter. But over time, one issue kept nagging at me. Basically, helicopters are absolutely brutal on servos because of the high vibration environment.

As an engineer, I knew the fix was easy because Uncle Sam overcame shock and vibration long ago by adopting MIL-STDS. Since nobody was willing to build to such demanding specs, the solution was to do it myself. We formed **ProModeler** (2015) and offered up our first two servos; one for cyclic control, plus a high speed gyro-optimized version designed for tail rotor.

One day a defense contractor, excited about what we were doing, reached out. One thing led to another and today, servos became the tail that wags the dog! Our lineup? Now 7 classes of PWM servos priced \$35-385 and ranging from 75-5255oz-in.

John

MAKE A NEW WAY OF LIFE

SHENZHEN FLYWING ACRO TECHNOLOGY CO.,LTD

Mission

To create accessible and ultra-realistic flight experiences for aviation enthusiasts worldwide, and let every flight awaken the profound sense of freedom deep within the soul.

Vision

To build a lifestyle defined by flight entertainment, and become the core technology provider for this lifestyle.

Values

Quality first

Deliver products that meet or exceed industry standards with strict quality control.

Customer-centric

Prioritize customer needs and satisfaction; exceed expectations always.

Teamwork

Leverage collaboration and sharing to unlock the full potential of teams and individuals.

Continuous innovation

Pursue new technologies, materials and processes to boost competitiveness through creative thinking.

About FLYWING

FLYWING Aeronautics was founded in 2018 by a group of young engineers passionate about RC models. We have always focused on the research, development, production, and sales of unmanned aerial vehicle control systems as well as solutions for unmanned helicopters. Our hope is that more RC model enthusiasts can enjoy more advanced and user-friendly RC models.

FLYWING's products

Helicopter

- Long-lasting battery life

Custom-designed simulated shell modification parts ensure stable flight performance and an ultra-long battery life.

- Easy operation

Equipped with omnidirectional GNSS positioning assistance, the helicopter enables autonomous hovering and return-to-home. Enjoy a premier flight experience effortlessly—anyone can be an ace pilot.

- Gps mode

Integrated with proprietary flight control, it fuses GPS coordinate and attitude data for autonomous hovering and hassle-free operation.

- One-key route mode

Powered by a high-performance Beidou-GPS module, the aircraft autonomously flies circular and figure-8 routes with smooth, elegant movements.

X Wing Fighter

- Dji/n3 vr glasses

1080p/100FPS HD Video Transmission: Balances clarity & smoothness, 24ms low latency, 6km max range (CE-compliant)

- hi-fi driving experience

1:1 Simulated Seat for a More Immersive Experience; Head Tracking Platform to Eliminate Visual Discontinuity; Movable Simulated Joystick to Replicate Real-World Operation Logic

- radar tracking

3km range: penetrates complex environments to lock onto hostile same-type aircraft, displays real-time positions & relative altitudes, and aids air combat situational awareness.

- Patented folding

Patented folding design: wings stow easily, fits into a backpack when fully compressed for single-person portability; rigid locking ensures stable, shake-free flight.

- Intuitive control

Hall sensor gimbal; frosted translucent shell with customizable RGB lighting; detachable gimbal & dedicated storage slot for the transmitter.

MEMBER GUIDE Protecting Your Freedom to Fly

MODELAIRCRAFT.ORG/GOV | MODELAIRCRAFT.ORG/SAFETY

Protecting your freedom to fly Protecting your freedom to fly model aircraft is the foundation of our government advocacy efforts. We work with legislators at the local, state, and federal levels and engage with the Federal Aviation Administration (FAA), Department of Transportation, Federal Communications Commission, Environmental Protection Agency, and Department of Homeland Security so that your voice will be heard and acted upon. AMA is committed to educating newcomers on how to safely operate. Because of our work representing this mission on Capitol Hill, Congress has recognized the efficacy of community-based organizations (CBOs) and our National Model Aviation Safety Program in legislation. AMA was named the first FAA-recognized CBO in the country, validating our Safety Programming as an authorized means of operating recreational, unmanned aircraft in the national airspace. Our hobby has faced many challenges throughout the years as we address an increase in government intervention and proposed regulations. The government team has actively pushed back against these challenges, working tirelessly on behalf of AMA members to secure airspace authorizations for operations in controlled airspace, obtain higher altitude limits for sanctioned events and club sites in both controlled and uncontrolled airspace, and protect the educational use of model aircraft. Your membership helps support AMA's government advocacy work, including AMA's legal team and lobbying effort. We know that the entire modeling community benefits when we speak with one voice. Stay informed about AMA's government advocacy efforts by visiting **MODELAIRCRAFT.ORG/GOV**

SAFETY: It's Part of AMA's DNA

The model aviation community has always looked to AMA to create safety practices. Starting in 1936, AMA was focused on keeping our model aviation competition community safe. As time passed, new activities and models came into existence. With these new models came the need to update safety programs. This process is still very much part of what AMA does today! The latest AMA Safety Handbook at **MODELAIRCRAFT.ORG/SAFETY**, outlines the current safety programs that cover all types of model aviation activities. From personal safety practices to club flying site layouts and event operations, the AMA Safety Program has been developed to mitigate risks and creates a safe atmosphere for model aviation enthusiasts to operate safely. It is recommended that everyone review this document regularly and help create a safe environment for all to enjoy this hobby!

Working with the FAA and Congress, AMA has shown some REAL FORTITUDE! The membership fee has been well worth every penny. I have a feeling that without the AMA we would have all gotten steam rolled into oblivion. It's ESSENTIAL that AMA membership continues to grow. In numbers we have strength to protect what we have always loved to do—and that is FLY!

AMA Foundation Fuel Your Passion

MODELAIRCRAFT.ORG/FOUNDATION

FUEL YOUR PASSION

Bronze Level \$25 to \$99.99

Silver Level \$100 to \$499.99

Gold Level \$500 to \$999.99

Diamond Level \$1,000 to \$4,999.99

Platinum Level \$5,000 to \$9,999.99

Heritage Society
Direct gifts of \$10,000 and greater

Legacy Society
Honoring those who include the AMA in their estate planning.

Other Ways to Give:
Memorial gifts, donation of stock, corporate matching gifts, QCD and IRA minimum distribution, and more.

Celebrate with a Brick on the AMA Walk of Fame

The AMA Walk of Fame is a walkway with personal and memorial engraved bricks in front of AMA Headquarters (part of the International Aeromodeling Center) in Muncie, Indiana. Engraved bricks are available in different sizes starting at \$150.

The AMA Foundation is the philanthropic arm of AMA, dedicated to upholding the joy of flight among model aviation enthusiasts, students, children, and communities through its strategic focus areas: STE(A)M and model aviation education, club grants, the National Model Aviation Museum, scholarships, and external grants to AMA and the International Aeromodeling Center.

Programs Fund

The Foundation Programs Fund provides support to all AMA charitable programs and initiatives, including the following areas: club grants, STE(A)M and model aviation education, and funding for the National Model Aviation Museum.

Endowment Fund

The Foundation Endowment Fund provides predictable funding in perpetuity to the AMA Foundation. The Endowment Fund is structured so that the principal amount invested remains intact, while the investment earnings are available for operational and program use. The Endowment Fund allows the AMA Foundation to draw investment earnings for permanent operational support and expenses so that annual donations go directly to support charitable programs. Your gift to the endowment is one that will keep giving year after year—a continuation of your legacy for generations to come.

Education Fund

Supports development of programming and model aviation activities for youth, AMA clubs, schools, and higher education with a focus on STEM-related curricula.

Museum Patron Program

Contribute to the National Model Aviation Fund at varying levels of support, from \$25 to \$1,000.

How You Can Donate

Make a one-time or monthly donation (AMA Torchbearer) by phone, mail, or at modelaircraft.org/donate.

Include the AMA Foundation in your estate and leave a lasting legacy with available naming rights. Visit MODELAIRCRAFT.ORG/HOW-TO-GIVE to learn more.

All donors contributing \$10 or more will receive recognition in *Model Aviation* magazine and AMA's annual report. Donors will also see a donor icon printed on their AMA membership card.

MEMBER GUIDE

National Model Aviation Museum

MODELAIRCRAFT.ORG/MUSEUM

NATIONAL MODEL AVIATION MUSEUM

The National Model Aviation Museum

will take you on a journey through model aviation history beginning in the late 1700s to the present day. Dedicated to collecting and preserving significant pieces of model aviation history, the collection features more than 10,000 artifacts, including model airplanes, radio systems, engines, building tools and equipment, and memorabilia such as trophies, patches, stickers, and clothing.

The museum is located on the grounds of the AMA International Aeromodeling Center in Muncie, Indiana. As an AMA member, you receive free admission to the museum. Unable to visit the museum? Go online and take a virtual tour.

Model Aviation Library and Archives

The Lee Renaud Memorial Library, located in the museum, contains more than 5,800 books, magazines, newsletters, and more than 900 periodical titles (about 48,000 individual issues) related to model aviation, full-scale aviation, and aviation history. The archives contain both records of the AMA and manuscript collections donated by individuals, clubs, and companies.

AMA Model Aviation Hall of Fame

The AMA Model Aviation Hall of Fame honors men and women who have made significant contributions to model aviation. Contributions can be in volunteer or administrative activities, product development, competition performance, or a variety or combination of activities.

AMA History Project

The AMA History Project is an ongoing initiative to assemble and store biographies of model aviation enthusiasts, club histories, companies, organizations, flying events, and special interest groups. Visit the museum website to view the AMA History Project or learn how to make a submission.

To learn more about the National Model Aviation Museum, or to contact the staff, visit

MODELAIRCRAFT.ORG/MUSEUM.
